Example of how to use the dashboards:

Dashboards organize and present information in a way that is very easy to use and read. Although it’s very easy to use, there are some rules to remember when using.

For example, if you are looking at the fall enrollment trend as of the census date, you would be able to find out about female Hispanic students enrolled at East Campus who have chosen their program area as Accounting and intend to pursue a PCC degree or certificate, please follow the procedure below:

1. Click on “East Campus” from “College” filter.
2. Click on “Hispanic/Latino” option from “Race/Ethnicity” filter
3. Click on “Female” from “Gender” filter
4. Click on “Pursuing a PCC degree or certificate” from “Intent” filter
5. Click on “Accounting” from “Program Area” filter. You will notice that “Program Type” and “Program Code” will change along with the program area you choose.
6. Click on Terms to look at different term retention and persistence rates, since the charts only show one term at a time.

If you would like to do another combination of choices given in the dashboard please remember to turn off all the filters before doing so. Simply click on the filter image (❌) on the top right corner of the filter to turn it off.

If you would like to choose more than one option in the filters hold the “Ctrl” key and click on your choices.
